

## LIGHT DUTY

Designed for use as a recovery heater having its own storage tank.  
Available in upright standard models and lowboy models.

### GLASSLINED TANK

- Thirteen sizes; 6 thru 119 gallon capacity. Tank interior is coated with glass specially designed by American for water heater use.

### ELEMENTS

- Zinc plated copper sheaths for longer life. Medium watt density means lower surface temperature to minimize scale build-up and more surface to heat water. Element sizes from 1.5 to 6 KW. Maximum input 12 KW (see chart).

### STANDARD VOLTAGES

- 120, 277 single phase and 208, 240 and 480V unbalanced three-phase delta; easily converted to single-phase at terminal block (except 208V with 6000 watt elements). Single element heaters, single-phase only.

### TERMINAL BLOCK

- Factory-installed. Just bring the service to heater and connect to block. Terminal block not supplied on 120V & 277 volt models. (No junction box on LCDE 6-20)

### CONTROLS

- Temperature control (adjustable through range of 110° to 170°F on single element and 120° to 181°F on dual element) and manual reset high temperature cutoff per element (dual element models). Factory-wired for non-simultaneous operation; easily converted to simultaneous element operation (three phase models only).

### CSA CERTIFIED AND ASME RATED T&P RELIEF VALVE

### SIMPLIFIED CIRCUITRY, COLOR CODED FOR EASE OF SERVICE

### ANODE ROD FOR MAXIMUM CORROSION PROTECTION

### CABINET HAS BONDERIZED UNDERCOAT WITH BAKED ENAMEL FINISH

### TOP INLET AND OUTLET OPENINGS (LDCE 30-120)

### DRAIN VALVE (EXCLUDES LDCE 6-20)

### UL APPROVED FIELD CONVERSION PROGRAM

### COMPLIANCE

- Meets the standby loss Requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1.

### LIMITED WARRANTY OUTLINE

- If the tank should leak any time during the first three years, under the terms of the warranty, American will furnish a replacement heater; installation, labor, handling and local delivery extra. THIS OUTLINE IS NOT A WARRANTY. For complete information consult the written warranty or American Water Heaters.

Recovery capacities at 100° F rise equal: for non-simultaneous element operation = 4.1 gal. x kW of one element; for simultaneous element operation = 4.1 gal. x 2/3 kW of both elements. For other rises multiply element kW as previously explained by 410 and divide by temperature rise. Full load current for single phase = total watts :- voltage.

## SPECIFICATION

The water heaters(s) shall be Light Duty Model(s) No. \_\_\_\_\_ as manufactured by American or an approved equal. Heater(s) shall be rated at \_\_\_\_\_kW, \_\_\_\_\_volts, \_\_\_\_\_-phase, 60 cycle AC, and listed by Underwriters' Laboratories. Models shall meet the standby loss requirements of the U.S. Department of energy and current edition of ASHRAE/IESNA 90.1. Tank(s) shall be \_\_\_\_\_gallon capacity. Heater(s) shall have 150 psi working pressure and be equipped with extruded high density anode rod. All internal surfaces of the heater(s) exposed to water shall be glasslined with an alkaline borosilicate composition that has been fused-to-steel by firing at a temperature range of 1400°F to 1600°F. Electric heating elements shall be medium watt density with zinc plated copper sheath. Each element shall be controlled by an individually mounted thermostat and high temperature cutoff switch. The outer jacket shall be of backed enamel finish and shall enclose the tank with foam insulation. Electrical junction box with heavy duty terminal block shall be provided (except on 120V & 277V {no junction box on LCDE-6 thru 20}). The drain valve shall be located in the front for ease of servicing. Heater tank shall have a three year limited warranty as outlined in the written warranty. Fully illustrated instruction manual to be included.

**For technical information call (800) 999-9515. American Water Heaters reserves the right to make product changes or improvements without prior notice.**
