Headquartered in Ashland City, Tennessee, American Water Heaters is one of the nation’s largest manufacturers of water heaters. American is proud to offer a full line of residential and commercial, gas and electric water heaters to meet the needs of the plumbing professional.

American is committed to being a reliable partner by providing well-built products and superior customer service. American’s dedication to research, development, and sound engineering principles contribute to the consistent performance of the water heating products. Similarly, customer service remains a top priority at American, offering customers unmatched product support.

For more information about our products, please visit us online at americanwaterheater.com.

Features & Benefits

Blue Diamond® Glass Coating
Provides superior corrosion resistance compared to industry-standard glasslining.

Self-Powered Electronic Gas Valve
American gas water heaters are equipped with a self-powered electronic gas valve with intelligent control logic. The gas valve has an internal microprocessor that provides enhanced operating parameters and tighter differentials for precise sensing and faster heating response to optimize performance. The self-powered electronic gas valve uses a thermopile to generate the power needed to operate the electronic gas control without requiring an external power source. It also incorporates an LED Status Indicator that monitors system operation and service diagnostics.

Enhanced-Flow Brass Drain Valve
• Our residential water heaters have a solid brass, tamper resistant, enhanced-flow, ball type, drain valve.
• Uses a standard female hose fitting that allows for fast and easy draining during maintenance.
• Designed for easy operation, this valve includes an integral screwdriver slot that features a 1/4 turn (open/close) radius, which not only permits full straight-through water flow but also a quick and positive shut off.

Self-Cleaning Dip Tubes
Helps reduce lime and sediment buildup and maximizes hot water output. Made from long-lasting PEX cross-linked polymer.

Heat Trap Nipples
Helps mitigate standby heat loss. Factory-installed for faster installation.

ENERGY STAR®
American offers a variety of models that are ENERGY STAR® qualified. Learn more at www.energystar.gov.

Green Choice® Burner
Patented eco-friendly burner design reduces NOx emissions up to 33% and complies with low NOx emissions of less than 40 ng/J.
Enhanced Ultra-Low NOx burner complies with SCAQMD Rule 1121 and other air quality management districts with requirements for NOx emissions of less than 10 ng/J.

Coregard™ Anode Rod
Our anode rods have a stainless steel core that extends the life of the anode rod allowing superior tank protection far longer than standard anode rods.

NAECA III Compliant
To select the right American water heater for your home, you need to consider the size of your family and other factors that contribute to your First Hour Rating (FHR) Requirement. The charts below provide suggested American residential water heater selection guidelines for several family sizes.

<table>
<thead>
<tr>

</tbody>
</table>

1. Determine whether your family is low demand or high demand. You should consider your family to be high demand if...
   - There are more than two full baths in the home.
   - There are (or will be) teenagers living in the home. It’s a fact: teenagers use more hot water for showering and washing clothes.
   - You have an oversize whirlpool bath or other large tub. As a rule of thumb, the water heater tank capacity should be 100% of the bathtub capacity (example: 75-gallon tub / 75-gallon water heater).

2. Locate your family size and determine the first hour rating requirement for your family. If you decide your family is high demand, consider moving up to the next first hour rating level.

3. Consult the heater options on the following pages for an American residential water heater with a first hour rating that meets your requirements.

**Tankless Sizing**

The temperature of incoming ground water (cold water inlet temperature) varies greatly throughout the U.S. and also fluctuates with the changing of the seasons. The temperature of water as it enters the water heater will determine the amount of “temperature rise” required to achieve the desired hot water outlet temperature (120°F is recommended).

The best way to measure your incoming ground water temperature is to use a thermometer to measure cold water temperature during the coldest season of the year. To simplify the process, use this map to determine whether your installation location is in the Southern Zone, Central Zone or Northern Zone.

**PEAK HOT WATER DEMAND**

The next step is to determine how many gallons per minute of hot water will be required during the busiest usage period (“peak demand”). Consider all appliances and fixtures that use hot water, including lavatory faucets, kitchen faucets, washing machines, dishwashers, showers and bathtubs. Be sure to determine how many appliances and fixtures will be used at the same time (“peak demand”).
The U.S. Department of Energy (DOE) regulates minimum energy efficiency requirements for all brands of water heaters. A new update to the rules for increasing minimum energy efficiency is in effect as of April 16, 2015.

**AT AMERICAN, WE’VE PREPARED OUR LINE OF RESIDENTIAL WATER HEATERS TO MEET THE STANDARDS. BUT AS SOMEONE IN THE BUILDING COMMUNITY, YOU NEED TO UNDERSTAND HOW THESE CHANGES IMPACT YOU AS WELL.**

These design changes require that most residential water heaters under 55 gallons of capacity produced after April 16, 2015 be larger in size. Therefore, they will require more installation space in both single-family and multi-family housing. Most water heaters under 55 gallons are 2” larger in height and diameter. Units over 55 gallons will require even more significant technology changes.

**WATER HEATER REPLACEMENT ISSUES? WE HAVE SOLUTIONS.**

**GAS**

**LESS THAN 55 GALLON**

WILL THE NEW LARGER DESIGN FIT? IF NOT, YOU HAVE TWO OPTIONS.

**OPTION 1:** Use a smaller heater to match the current footprint of your existing heater. You might consider adding a mixing valve on the water heater to increase delivery capacity.

**OPTION 2:** Upgrade to a smaller more efficient tankless unit.

**MORE THAN 55 GALLON**

THE TECHNOLOGY FOR UNITS OVER 55 GALLONS HAS CHANGED.

**OPTION 1:** Upgrade to one of American’s High Efficiency options such as tankless or High Efficiency Gas.

**OPTION 2:** Replace your obsolete model with 2 smaller gas heaters. (Example: two 40-gallon gas units in the place of one 75-gallon gas unit).

**ELECTRIC**

**LESS THAN 55 GALLON**

WILL THE NEW LARGER DESIGN FIT? IF NOT, SEE BELOW.

**OPTION 1:** Use a smaller heater to match the current footprint of your existing heater. You might consider adding a mixing valve on the water heater to increase delivery capacity.

**MORE THAN 55 GALLON**

THE TECHNOLOGY FOR UNITS OVER 55 GALLONS HAS CHANGED.

**OPTION 1:** Upgrade to one of American’s Hybrid Electric Heat Pump water heaters which is 2.5 times more efficient as a standard electric.

**OPTION 2:** Replace your obsolete model with 2 smaller electric heaters (Example: Two 40-gallon electrics in the place of one 80-gallon electric)

WHY PROFESSIONALS CHOOSE AMERICAN WATER HEATERS

EARN POINTS BY PURCHASING AMERICAN WATER HEATERS

It’s free and easy to participate. Enroll online at contractorrewards.com. Eligible products will have a yellow reward code label worth valuable points. Two ways to enter the codes:

1. Download the smart phone app and scan the code.
2. Enter the code at contractorrewards.com. Redeem your points on thousands of reward items.

With over 1,000,000 merchandise items, your reward choices are endless.

AMERICAN PROVIDES 4 KEY THINGS TO HELP GROW YOUR BUSINESS AND BECOME MORE PROFITABLE.

1. Contractor Rewards™ Program
   Our program rewards our loyal contractors for buying our products. Buy more and get rewarded with prizes.

2. Contractor Advertising Tools
   Our Advertising Resource Center allows contractors to develop an easy, affordable and custom advertising campaign to promote their business. Go to www.americanwaterheater.com/ads.

3. Breadth of Product Line
   Residential or commercial, we have the most complete line from standard models to the most innovative high efficiency water heaters available.

4. Product Sales Tools
   We provide contractors access to the sales tools needed to close more sales.

Visit americanwaterheater.com/contractor to learn more.

[Hot Water Output, Cost of Operation, & Installation Space Required estimated based on typical applications/installations. For a more custom analysis of unique installations, visit www.americanwaterheaters.com and use our product selector tool.](www.americanwaterheaters.com)
Sealed Combustion with Woven Fiber Premix Burner

- Metal fiber burner is designed for clean combustion in high-intensity blue flame mode. Manufactured of refractory steel that resists corrosion. Excellent resistance to thermal and mechanical shock, even at extreme temperatures. Uniform combustion provides excellent heat transfer. Meets Low NOx requirements for Texas and California.

Whisper Quiet Operation

- Ultra quiet blower and burner which minimizes noise.
- Requires 120 volt 60Hz power supply.
- Draws less than 5 Amps.

Power/Direct Vent Using 2” or 3” Plastic Pipe

- Direct vents up to 120’ using PVC, CPVC or ABS pipe either thru-the-wall or thru-the-roof.
- Optional concentric vent kit available for use Thru-the-Roof or Wall.

“Plug and Play” Technology

- No special adjustments are required at initial start up.
- Connect air inlet, exhaust outlet, water, electricity and gas, set the temperature and the system functions properly.

For propane (LP) gas change “N” suffix to “P” suffix in the model number.

The warranty is void for Residential Polaris® models installed in commercial applications.
**Power Vent Design for Installation Versatility**
- Modular blower, with 120 volt, 60Hz electrical system (5 amps or less), 6-foot cord with standard 3-prong connector.
- Combined horizontal and vertical vent runs terminating through an outside wall, using Schedule 40 PVC pipe as follows:
  - 2” pipe allows vent runs up to 45 equivalent feet.
  - 3” pipe allows vent runs up to 65 equivalent feet.
  - 4” pipe allows vent runs up to 128 equivalent feet.

**Side-Mounted Taps for Recirculating Systems**
- Hot and cold “side taps” allows the Nautilus Power Vent to be used for “combination” systems for water heating plus space heating, radiant floor heating or other applications requiring a recirculating hot water loop.

**Intelli-vent™ Gas Control with Silicon Nitride Hot Surface Ignitor**
- Premium-grade hot surface ignitor eliminates standing pilot.
- Electronic circuitry provides superior system diagnostics capabilities plus extremely precise temperature controls.

**Blue Diamond® Glass Coating with Two Heavy Duty Anode Rods**
- Provides superior corrosion resistance compared to industry-standard glasslining.

**Green Choice® Gas Burner**
- Patented eco-friendly burner design reduces NOx emissions by up to 33% and complies with Low-NOx emission requirements of less than 40 ng/J.

**Self-Cleaning Dip Tube**

**CSA Certified and ASME Rated T&P Relief Valve**

**Maximum Hydrostatic Working Pressure: 150 PSI**

**Code Compliance**
- Meets UBC, CEC and ICC National Codes.

**6-Year Limited Tank and Parts Warranty**
- For complete information, consult written warranty or americanwaterheater.com.

Standard model certified for sea level to 5,300 ft. elevation.
Optional Condensate Neutralizer Kit available (part number 9007059005).
RESIDENTIAL GAS

Nautilus™
Power Direct Vent

Helical Internal Heat Exchanger
- Spiral heat exchanger keeps hot combustion gases in the tank longer to lengthen the heat transfer cycle.
- Operates at 96% thermal efficiency which saves money on operating costs compared to standard 80% efficient gas water heater.

Power Direct Vent Design
- Combined vertical and horizontal runs terminating through an outside wall. Vents using PVC, CPVC or ABS pipe.
  - 2” pipe, vents up to 45 equivalent feet.
  - 3” pipe, vents up to 128 equivalent feet.

Condensing Design
- 96% efficient condensing design.
- Equipped with condensate design.

Side-Mounted Hot and Cold Recirculating Taps
- Allows the Nautilus to be installed as part of a combination space heating/water heating application.

Advanced Electronic Control
- Large LCD Display.
- Precise temperature control.
- Advanced diagnostics.
- iCOMM™ Compatible and can be monitored from remote locations.
- Call 1.888.WATER02 for more information.

Code Compliance
- Complies with SCAQMD Rule 1146.2 and other air quality management districts with similar requirements for Ultra-Low NOx emissions requirements of 14 ng/J or 20 ppm.
- Meets UBC, CEC and ICC National Codes.

6-Year Limited Tank and Parts Warranty
- For complete information, consult written warranty or go to americanwaterheater.com.

Available in propane (LP) gas. Specify when ordering propane (LP) gas.
Models certified for sea level to 10,100 ft. elevation.
Optional Condensate Neutralizer Kit available (part number 9007959005).
Versatile Power Vent Design
- All models feature an exclusive 3-position rotatable blower outlet which adds flexibility.
- Combined horizontal and vertical runs up to 180 equivalent feet with 4’ diameter venting (ABS, PVC, CPVC and polypropylene).
- All models are equipped with a protected sensor that detects the presence of flammable vapors and automatically disables the burner to prevent ignition.
- Air intake snorkel elevates the inlet location of combustion air to prevent flammable vapors from entering the sealed combustion chamber.

ENERGY STAR® Qualified
- All models (except PVG62-75T76-NVS) meet the ENERGY STAR® EF requirement and may also qualify for local utility and rebate programs.
- Built-in heat traps on the water inlet and outlet reduce the amount of heat lost through piping.
- 2-inch, thick, “Environmentally-Friendly” foam insulation reduces the amount of heat loss and contributes to overall energy efficiency.

Hot Surface Ignitor
- More robust and reliable than standing pilot, and reduces energy consumption.

User-Friendly
- State-of-the-art electronic gas control provides more precise temperature control.
- LED control light displays operation status and diagnostics information.

Enhanced-Flow Brass Drain Valve

Available in Natural Gas and Propane

Design-Listed by CSA International
- Certified at 300 PSI test pressure and 150 PSI working pressure.

6-Year Limited Tank and Parts Warranty
- For complete information, consult written warranty or go to americanwaterheater.com.

**Propane model has input of 58,000 BTU/hr.**
Available in propane (LP) gas. Specify when ordering propane (LP) gas.
Side connections standard on 50T62 and 75T76 models.
Side connections available on 40S40 and 50T45 models.
† PDVG62-75T76-NV is not ENERGY STAR® Qualified.
All models are certified from sea level to 10,100 ft. elevation.
Direct Vent

Direct Vent Design
• One-pipe, dual-channel closed system draws all make-up air from outside the home, eliminating problems caused by insufficient indoor ventilation and is FVIR compliant.
• Horizontal air intake and venting on all models up to 80 inches from outside wall with no electrical power needed.

Intelligent Control Logic

Green Choice® Gas Burner
• Patented eco-friendly burner design reduces NOx emissions up to 33% and complies with low NOx emissions of less than 40 ng/J.

Self Cleaning Dip Tup

Coregard™ Anode Rod

Push Button Piezo Ignitor

Heat Trap Nipples

Code Compliance
• Meets UBC, CEC and HUD National Codes.
• Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1
• Complies with the Federal Energy Conservation Standards effective April 16, 2015, in accordance with the Energy Policy and Conservation Act (EPCA), as amended.

Design-Certified by CSA International
• Certified at 300 PSI test pressure and 150 PSI working pressure.
• Listed according to ANSI Z21.10.1-CSA 4.1 standards governing storage tank-type gas water heaters.

6-Year Limited Tank and Parts Warranty
• For complete information, consult written warranty or go to americanwaterheater.com.

*Allow 29-1/2” for front to back dimension for air intake at rear of heater.
No option for Top T&P.
All models certified from sea level to 7,700 ft. elevation.
All models are available with side loop sittings. Add “L” to suffix of model (Example: 40S38-NOLV).
Dual-channel system has 3” vent pipe inside 6” air intake pipe, for the 40 and 50-gallon models.
All models have 2” foam cavity.
Water connection is ¾” male on all models.
High Efficiency

Pressurized Combustion System

Installation Friendly
- Allows for easy replacement of standard atmospheric vent heaters.
- Easily connects to existing B-vent

Fan-Assisted, Category 1 Appliance
- Plugs into standard 110/120V outlet (10 foot power cord included)

24V Electronic Control

LCD User Interface
- Easy-to-read, eye level display
- Simple temperature settings and adjustments
- Service diagnostics are in plain text

Powered Anode Rod

Enhanced-Flow Brass Drain Valve

Self-Cleaning Diffuser Dip Tube

Green Choice® Gas Burner
- Patented eco-friendly gas burner design reduces NOx emissions by up to 33% and complies with Low-NOx emission requirements of less than 40 ng/J

Code Compliance
- Meets UBC, CEC and HUD National Codes
- Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1
- Complies with the Federal Energy Conservation Standards effective April 16, 2015, in accordance with the Energy Policy and Conservation Act (EPCA) as amended

Design-Certified by CSA International
- Certified at 300 PSI test pressure and 150 PSI working pressure.
- Listed according to ANSI Z21.10.1-CSA 4.1 standards governing storage tank-type gas water heaters.

6-Year Limited Tank and Parts Warranty
- For complete information, consult written warranty or go to americanwaterheater.com

Water connection is 3/4” on all models. All models available in propane (LP) gas.
†Models ship with supplied insulation blanket.
For 10-year tank & 6-year parts limited warranty, change “6” to “10: in the model number. Example: G102-40T40.
*Optional side-mounted recirculating taps.
All models approved for installation from sea level to 10,100 ft. elevation.
Highest Recoveries
- Capacity/input combinations up to 98 gallons/75,000 BTU's to produce recoveries of up to 81 gallons per hour.

Fully Automatic Controls with Safety Shutoff
- Accurate, dependable control system requires no electrical connections.
- Fixed automatic gas shutoff device for added safety.

Green Choice® Gas Burner
- Patented eco-friendly gas burner design reduces NOx emissions by up to 33% and complies with Low-NOx emission requirements of less than 40 ng/J.

Self-Cleaning Diffuser Dip Tube

Coregard™ Anode Rod

Push-Button Piezo Ignitor

Blue Diamond® Glass Coating

Enhanced-Flow Brass Drain Valve

Code Compliance
- Meets UBC, CEC and ICC National Codes.

Design-Certified by CSA International
- Certified at 300 PSI test pressure and 150 PSI working pressure.
- Listed according to ANSI Z21.10.1-CSA 4.1 standards governing storage tank-type gas water heaters.

CSA Certified and ASME Rated T&P Relief Valve

Maximum Hydrostatic Working Pressure 150 PSI

6-Year Limited Tank and Parts Warranty
- For complete information, consult written warranty or go to americanwaterheater.com.

All models available in propane (LP) gas. Specify when ordering.
Residential Gas

Mobile Home Atmospheric Vent

Complies with HUD Standards for Manufactured Housing Installation

Gas Control Convertible for Natural and Propane Gas
- For flexibility to meet the varying needs of manufactured housing installations.

Green Choice® Gas Burner
- Patented eco-friendly burner design reduces NOx emissions by up to 33% and complies with Low-NOx emission requirements of less than 40 ng/J.

Coregard™ Anode Rod
- Our anode rods have a stainless steel core that extends the life of the anode rod allowing superior tank protection far longer than standard anode rods.

Blue® Glass Coating
- Provides superior corrosion resistance compared to industry standard glass lining.

Enhanced-Flow Brass Drain Valve

Code Compliance
- Meets UBC, CEC and HUD National Codes.

Design-Certified by CSA International
- Certified at 300 PSI test pressure and 150 PSI working pressure.
- Listed according to ANSI Z21.10.1-CSA 4.1 standards governing storage tank-type gas water heaters.

CSA Certified and ASME Rated T&P Relief Valve

Maximum Hydrostatic Working Pressure 150 PSI

6-Year Limited Tank and 2-Year Limited Parts Warranty

All models may be ordered from the factory with top T&P valve as an option.
*Side loop connections are standard on model GU62-50T50.
Models with a ring base (GU62-40S40 and GU61-30T30) are certified from sea level to 7,700 ft. elevation.
Ultra-Low NOx Power Vent

Power Venting Made Simple

- Thru-the-wall or thru-the-roof power venting using either 2" or 3" PVC, ABS or CPVC vent pipe.

Intelli-Vent™ Gas Control

- Advanced electronics for more precise control of water temperature and easy to understand system diagnostics.

Combination Thermostat/ECO

- Utilizes an intermittent ignition gas valve (no standing pilot) with thermistor temperature sensor and built-in high temperature cut off

Quiet and Efficient Blower

- Factory-installed 6-foot power cord with standard 3-prong male connector provided. Electrical requirements; 110/120 VAC power source, less than 5 amp draw.

Self-Cleaning Dip Tube

- Reduces lime sediment buildup and maximizes hot water output. Made from long-lasting PEX cross-linked polymer.

Coregard™ Anode Rod

Durable, Ultra-Low NOx Burner Construction

Enhanced-Flow Brass Drain Valve

Code Compliance

- Meets UBC, CEC and HUD National Codes.

Design-Certified by CSA-International

- Certified at 300 PSI test pressure and 150 PSI working pressure.
- Listed according to ANSI Z21.10.1-CSA 4.1 standards governing storage tank-type gas water heaters.

6-Year Limited Tank and Parts Warranty

- For complete information, consult written warranty or go to americanwaterheater.com.

No option for top T&P valve.
RESIDENTIAL GAS

Ultra-Low NOx Direct Vent

Flammable Vapor Resistant/Direct Vent Sealed Combustion System

Durable, Ultra-Low NOx Burner Construction

Non-CFC Foam Insulation

• The tank is surrounded by a thick coat of non-CFC polyurethane foam to trap heat inside the tank, saving energy.

¾" Top Water Connections and Side Space Heating Connections

½" Gas Connection

Combination Thermostat/ECO

Coregard™ Anode Rod

Blue Diamond® Glass Coating

Green Choice® Gas Burner

• Complies with SCAQMD Rule 1121 and other air quality management district with similar requirements for NOx emissions of less than 10ng/J.

Code Compliance

• Meets UBC, CEC and HUD National Codes.

• Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1.

• Complies with the Federal Energy Conservation Standards effective April 16, 2015, in accordance with the Energy Policy and Conservation Act (EPCA), as amended.

Design-Certified by CSA-International

• Certified at 300 PSI test pressure and 150 PSI working pressure.

• Listed according to ANSI Z21.10.1-CSA 4.1 standards governing storage tank-type gas water heaters.

CSA Certified and ASME Rated T&P Relief Valve

6-Year Limited Tank and Parts Warranty

• For complete information, consult written warranty or go to americanwaterheater.com.

No option available for top T&P valve.
All models have ¾" top water connections and come standard with side loop fittings.
All models are certified from sea level to 7,700 ft. elevation.
Fully Automatic Controls with Safety Shutoff

Heavy Gauge Steel Jacket

Blue Diamond® Glass Coating
• Provides superior corrosion resistance compared to industry-standard glasslining.
• Maximizes tank life.

Foam Insulation

Ultra-Low NOx Emissions
• Complies with SCAQMD Rule 1146.2 and other Air Quality Management Districts with similar requirements of 14 ng/j or 20 ppm.

Easy-to-Install
• Completely factory-assembled. Only gas, water and vent connections need to be made. All connections are located in front and top of heaters for ease-of-installation and service.

Coregard™ Anode Rod
• Our anode rods have a stainless steel core that extends the life of the anode rod allowing superior tank protection far longer than standard anode rods.

Maximum Pressure
• 150 psi.

Maximum Gas Inlet Pressure
• 14” W.C.

Code Compliance
• The Ultra-Low NOx atmospheric vent residential gas water heater meets the thermal efficiency and standby loss requirements of the U. S. Department of Energy and Current Edition ASHRAE/IESNA 90.1.

6-Year Limited Tank and Parts Warranty
• For complete information, consult written warranty or go to americanwaterheater.com.

ENERGY STAR® Qualified

Condensing Technology Provides 0.93 Energy Factor (EF)

Ultra-Low NOx Emissions
- Complies with SCAQMD Rule 1146.2 NOx Emission Requirements of 14 ng/J or 20 PPM.

Copper Primary Heat Exchanger
- 25x better heat transfer than stainless steel thus stabilizing outgoing water temperature quicker and reducing pressure drop across the heat exchanger.

Secondary Heat Exchanger
- Marine-grade 316L stainless steel to protect against corrosion.

Maximum Flow Rate of up to 6.6 GPM

Indoor Models
- Include a built-in temperature controller and advanced diagnostics to simplify troubleshooting.

Outdoor Models
- Include a wall mount temperature remote controller and advanced diagnostics to simplify troubleshooting.

Factory-Installed Power Cord Included for Indoor Models

Electronic Ignition - No Pilot Light

Safety Features:
- Exhaust & Water Temperature Safety Control.
- Overheat Cut-Off Fuse.

Internal Freeze Protection System

Warranty
- 15-year limited warranty on heat exchanger in residential application.
- 10-year limited warranty on heat exchanger in commercial applications.
- 5-year limited warranty on all parts.

The High Efficiency hybrid electric heat pump water heater from American is the most cost effective energy-efficient option available for consumers who want to save money on their utility bills. High Efficiency hybrid electric heat pump can reduce water heating costs up to 68% and provide payback in 2-3 years. With annual savings of $419 or more, there is no better way to go green than the High Efficiency hybrid electric heat pump.

How do they work?
Heat pump water heaters absorb ambient heat from surrounding air to heat water using a compressor and environmentally-friendly R134a refrigerant

- Self-contained heat pump unit is integrated onto the top of the tank
- Multiple operating modes maximize efficiency and performance

Qualifies for Many State and Local and Local Utility Rebates— Check www.dsireusa.org

Increased Energy Efficiency

- Improved efficiency designed in, to ensure available hot water at the lowest possible cost
- Up to a 2.75 Energy Factor (EF) Rating conserves energy and meets ENERGY STAR® qualifications

Choice of Operating Modes

- Select from efficiency, hybrid, or electric modes to match heating requirements to environmental conditions and hot water demand. Hybrid mode automatically adjusts between compressor and element, depending upon heat requirements.
- Vacation mode reduces operating costs and provides freeze protection during extended absence. Programmable up to 99 days.

Back up Electric Elements

- Long-lasting, 240 VAC incoloy heating elements, 200W lower and 4500W upper, help heat water when in conventional electric or hybrid modes.

Dry Fire Protection

- Control system ensures the tank is full of water during start up to prevent dry firing the heating elements

Electronic User Interface

- User-friendly electronic interface allows easy control of temperature setting, operating mode, and communicates diagnostics
- Easy to read temperature display shows temperature in °F or °C
- Advanced diagnostics convey error messages for service purposes. The last four error messages are saved in the control system memory.

10-Year Limited Warranty

- For complete information, consult written warranty or go to americanwaterheater.com.

Requires 30 amp breaker.
Top T&P option not available on these models.
Increased Storage
• High capacity storage tank enables the heat pump to operate more frequently than backup heating elements. This improves energy efficiency and lowers operating costs, saving more money than lower capacity units
• High capacity storage tank provides more hot water for peak demand periods

Energy Efficiency
• Up to 2.33 Energy Factor (EF) rating conserves energy and meets ENERGY STAR® qualifications.

Choice of Operating Modes
• Select from efficiency, hybrid, or electric modes to match heating requirements to environmental conditions and hot water demand. Hybrid mode automatically adjusts between compressor and element, depending upon heat requirements. Vacation mode reduces operating costs and provides freeze protection during extended absence.

Back up Electric Elements
• Long-lasting, 240 VAC incoloy heating elements, 2000W lower and 4500W upper, help heat water when in conventional electric or hybrid modes.

Dry Fire Protection
• Control system ensures the tank is full of water during start up to prevent dry firing the heating elements

Electronic User Interface
• User-friendly LCD touch-pad control, with plain English text and intuitive status icons provides easy interaction
• Large LCD temperature display shows temperature in °F or °C
• 3 line, 13 character backlit LCD display
• Advanced diagnostics convey error messages for service purposes. The last four error messages are saved in the control system memory.

Accessory Inlet/Outlet Duct Kits with Booster Fan
• Permits installation in confined spaces as small as 4’ x 4’ x 8’ (128 cubic feet)
• Duct adaptor kits redirect inlet and/or outlet air
• Booster fan extends total duct distance from 10’ to 25’
• Engineered solution – ensures optimal efficiency performance

6-Year Limited Tank and Parts Warranty
• For complete information, consult written warranty or go to americanwaterheater.com

Electronic User Interface
- Touchscreen display.
- Multiple operating modes help save money.
  - Energy saver and vacation modes available.
- Diagnostic feedback.
- Dry fire protection.
- Grid management ready for future CEA-2045 Bridge module.

Enhanced Heating Elements
- Dual 5500 watt elements for the fastest recovery and reliable operation.
- Incoloy stainless steel elements last longer than standard copper elements.

Enhanced-Flow Brass Drain Valve

Code Compliance
- Meets UBC, CEC and HUD National Codes.

Approved for Manufactured Housing
- All residential electric water heaters are compliant with HUD standards for mobile homes/ manufactured housing

Design-Listed by Underwriters Laboratories
- Certified at 300 PSI test pressure and 150 PSI working pressure. Listed according to ANSI Z21.10-1 CSA 4.1 standards governing storage tank-type water heaters.

10-Year Limited Tank and Parts Warranty
- For complete information, consult written warranty or americanwaterheater.com

¾" water connections on 8" center.
Top-mounted T&P valve not available.
Only available for 240V or 208V applications.
Equipped as dual element only, no single element configurations available.
Enhanced Heating Elements
• Dual 4500 watt elements for faster recovery and reliable operation.
• Incoloy stainless steel lower element lasts longer than standard copper elements.

Self-Cleaning Dip Tube
Coregard™ Anode Rod
Blue Diamond® Glass Coating
Enhanced-Flow Brass Drain Valve

Code Compliance
• Meets UBC, CEC and HUD National Codes.
• Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1.
• Complies with the Federal Energy Conservation Standards effective April 16, 2015, in accordance with the Energy Policy and Conservation Act (EPCA), as amended.

Approved for Manufactured Housing
• All residential electric water heaters are compliant with HUD standards for mobile homes/ manufactured housing.

Design-Listed by Underwriters Laboratories
• Certified at 300 PSI test pressure and 150 PSI working pressure.
• Listed according to ANSI Z21.10.1-CSA 4.1 standards governing storage tank-type water heaters.

6-Year Limited Tank and Parts Warranty
• For complete information, consult written warranty or go to americanwaterheater.com.

3/4” water connections on 8” center.
*Models ship with supplied insulation blanket.
† For 10-year tank and 6-year parts limited warranty, change “6” to “10” in the model number (example: E10N-40H).
+Top T&P option not available on this model.
Only available for 240V or 208V applications.
RESIDENTIAL ELECTRIC

Approved for Manufactured Housing
- All residential electric water heaters are compliant with HUD Standards for mobile homes/manufactured housing.

Coregard™ Anode Rod
- Our anode rods have a stainless steel core that extends the life of the anode rod allowing superior tank protection far longer than standard anode rods.

Side Water Connections
- For ease of installation in mobile home applications.

Long-Lasting Heating Elements
- Screw-in, direct immersion, 3000W/120V heating elements for maximum efficiency.

Blue Diamond® Glass Coating

Enhanced-Flow Brass Drain Valve
- Our residential water heaters have a solid brass, tamper-resistant, enhanced-flow, ball-type, drain valve.
- Uses a standard female hose fitting that allows for fast and easy draining during maintenance.

Code Compliance
- Meets UBC, CEC and HUD National Codes.

Design-Listed by Underwriters Laboratories
- Certified at 300 PSI test pressure and 150 PSI working pressure.
- Listed according to UL 174 standards governing storage tank-type electric water heaters.

6-Year Limited Tank and Parts Warranty
- For complete information, consult written warranty or go to americanwaterheater.com.

*Models ship with supplied insulation blanket.
MHE6 models have limited element options due to element size or other restrictions.
Available with side T&P only.
¾” water connections.
### Table Top
- Features a convenient flat porcelain surface at 36” height, providing extra “counter space” wherever installed. All plumbing and electrical connections are made through the back of the water heater. This heater is equipped with a PEX cross-linked polymer dip tube.

### Point-Of-Use
- Designed for low-demand, such as office lavatories or buildings with remote restrooms.

### Compact
- Top-mounted plumbing connections (optional side-mounted water connections for field conversion). Designed for installation under a counter, in a crawl space or in other tight spaces.

### Enhanced-Flow Brass Drain Valve

### Code Compliance
- Meets UBC, CEC and HUD National Codes.

### Approved for Manufactured Housing
- All residential electric water heaters are compliant with HUD Standards for mobile homes/manufactured housing.

### Design-Listed by Underwriters Laboratories
- Certified at 300 PSI test pressure and 150 PSI working pressure.
- Listed according to ANSI Z21.10.1-CSA 4.1 standards governing storage tank-type water heaters.

### 6-Year Limited Tank and Parts Warranty (except Point-Of-Use model, which is 5-Year)
- For complete information, consult written warranty or go to americanwaterheater.com.
