

**JUST PLAIN RELIABLE.
FROM ANY ANGLE
YOU LOOK AT IT.**

We designed our new PowerFlex® Power Vent water heater to be easier to install, with more flexibility and options. To start with, we designed a three-position rotating blower, for more installation flexibility. It can also handle PVC vent lengths up to 180 feet. And we located all serviceable components within 90 degrees of the front of the unit for easy access. The new American PowerFlex Power Vent—one more reason you can rely on American. For more information on the PowerFlex Power Vent water heater, visit americanwaterheater.com.
