

# On-Demand Concentric Vent Components

- For indoor concentric venting models: 305, 505
- These models incorporate a condensate collector and do not require an “adapter” vent component.
- Plastic vent components consist of an outer plastic vent for the air intake and an inner metal vent for the exhaust gases.

Refer to the installation manual and the Ubbink installation instructions for complete installation details and requirements.

*We are continually updating and improving products; therefore, specifications are subject to change without prior notice. Local, state, provincial and federal codes must be adhered to prior to installation.*
